

CONDITION: 1

Research Methods 3213 Project 1 Data Collection Sheet

Age: _____ years

Sex: M F

Race: Asian Black Hispanic White Other

Point your web browser to

<http://luna.cas.usf.edu/~mbrannic/files/resmeth/labs/condition.htm>

Click on condition 1 or condition 2. Choose the same number as the condition at the top of this piece of paper. A picture of a face should appear. If it does not appear, ask for help from your lab instructor.

Consider the face. How good looking is the face? Circle the number that best indicates your opinion. If you think this face is average, you would circle a number about 5. If you think the face is very good looking, you would circle a large number, and if you think the face is very bad looking, you would circle a small number.

Ugly			Average			Good Looking		
1	2	3	4	5	6	7	8	9

Click 'next.' Two faces should appear. Your task now is to compare the two faces and determine whether one is better looking than the other. If they are the same in terms of good looks, you would circle the 5. If the picture on the right is better looking, circle a large number. If the picture on the left is better looking, circle a small number.

Left is better			Equal			Right is better		
1	2	3	4	5	6	7	8	9

When you are finished making your ratings, click 'done' and the browser will point to Brannick's web page. Give this piece of paper to your lab instructor. Lab instructors will code data. We will upload data from all the sections for you to analyze.
