The publisher would like to apologise for an error in the reproduction of Figure 2 in the above paper. The corrected Figure is reproduced below.

FIG. 2. Kinematic profiles of select variables for (a) wild *Micropterus salmoides floridanus* capturing mosquito fish and (b) hatchery-reared *M. s. floridanus* capturing pellets within four size classes. Variables include total bite duration (■), duration of hyoid depression (▒), maximum gape distance (—) and maximum hyoid depression (---).
